MONORAIL DOOR

DURABLE, DEPENDABLE DOORS WITH STRENGTH YOU CAN TRUST

Designed specifically to shrug off the abuses of industrial applications, our Monorail Doors can even withstand the brutal effects of positive and negative wind loads. These doors are great for transporting equipment in and out of factories, mining operations, steel manufacturing plants, grain processing facilities and other industrial operations. Our doors are 100% customizable by size and design, with bi-part sliding or paired swing variations. Quality and reliability are just two of the characteristics that set our Monorail Doors apart from the rest.

STRONG ENOUGH TO WITHSTAND THE PRESSURE

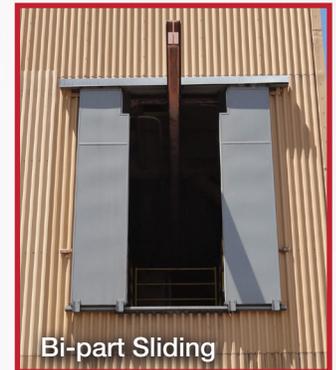

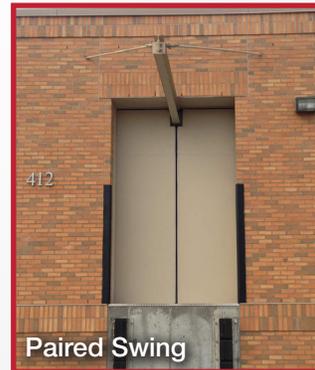

- Features fully welded, structural internal framework engineered for your opening size and wind loads
- Reduces maintenance with long-lasting construction that is unaffected by high winds, continuous use or weather conditions
- Made with high-capacity, spark-less, non-corrosive rollers with greaseable bearings and seals

IMPROVES WORKER SAFETY AND PRODUCTIVITY

- Easily operated by employees in all weather conditions
- Monorail notch allows door to close and seal around your beam
- Optional safety rail can be added for fall protection

CUSTOMIZABLE OPTIONS

- Available in manual, hand chain or electric operation
- Manufactured in 16-gauge mild steel or stainless steel
- Designed to swing in or swing out as needed
- Bus bar and monorail notch locations can be modified
